Financial Services

“What a truly inspirational speaker. Dr Paul Thomas has a way of looking at things that challenges the norm in relation to the set up and running of large corporations. His observations on people, how they are motivated and how to get the best out of them are extremely accurate. If all corporations were to listen to Paul the world would be a more productive yet happier place.” Charlotte Poole-Graham BA (Hons) DipPFS Associate Partner | St. James's Place Wealth Management

“Andy McCann is one of that rare breed of people who have the vision and intellect to inspire virtually any audience. To see him operate is an uplifting, refreshing and pleasurable experience. I sat in on one of his seminars, for 300 people, dealing in the main with financial issues. Being in financial services for almost 25 years myself, I didn't know quite what to expect from someone who, whilst a great seminar speaker, doesn't work in my line of professional business. I watched him work the stage and the audience with total assuredness and mastery of the subject matter for that session. I have to admit to having learned a number of new things from watching Andy at work – none of us know it all - to the extent that I might have easily mistaken him for an experienced and seasoned financial services professional. First class, no other way to put it.” Paul Fielding, Cambria Financial

“I was fascinated by Andy, not only by the content, but by the brilliance of his delivery.” Karen Morgan, Utility Warehouse
